

We Take Precautions for You

Because you, our patients, are important to us, we are taking special steps to protect you and your health. These steps include:

Washing our hands
before and after
patient care

Putting on gloves
when contact with blood
and/or bloody fluids
is likely to occur

Disposing of used needles
and sharp objects
by placing them
in a puncture proof
container

Cleaning
our surroundings
and equipment
by using disinfectants

Putting on a mask, eye
protection, and a gown
if splash or splatter
of blood or bloody
fluids is likely to occur

If you don't think all of these precautions are being taken, talk with your health care provider, or you may contact the Maryland State Board of Dental Examiners at 410-402-8500.
